T. Traini, M. Danza, I. Zollino, L. Marinucci and F. Carinci. Comparison between implant retrieved from human mandible and maxilla: an histomorphic-metric evaluation.......................................................................................................................... 9
A. Busato, V. Vismara, L. Bertele’, I. Zollino, S. Fanali, G. Trapella, A. Avantaggiato and F. Carinci. Relation between occlusion, TMJ pain and idiopathic scoliosis: a retrospective study on 120 patients................................................................. 25
M. Danza, S. Fanali, L. Rigo, M. Franco, A. Avantaggiato, A. Lucchese, I. Zollino and F. Carinci. Cryopreserved homologue iliac crest grafts used in sinus lifting for implant rehabilitation: a case series analysis................................................................. 29
M. Danza, S. Fanali, A. Viscioni, M. Franco, A. Avantaggiato, A. Lucchese, I. Zollino and F. Carinci. Implants inserted in maxillary sinus grafted with fresh frozen homologue iliac bone: a retrospective study................................................................. 35
M. Lapparelli, M.A. Lorenzin, G. Trapella, I. Zollino, G. Carnevali and F. Carinci. Custom-made cranial valut reconstruction: a retrospective study.......................................................................................................................... 41
V. Sollazzo, S. Fanali, E. Masiero, A. Girardi, F. Farinella, E. Mellon, F. Pezzetti, C. Iaccarino, G. Zauli and F. Carinci. Tricalcium phosphate stimulates adipose tissue-derived stem cells towards osteoblasts differentiation................................................................. 51
S. Fanali, I. Zollino, A. Avantaggiato, G. Brunelli, B. De Rossi and F. Carinci. Comparison between implants inserted into native and grafted bone: a retrospective cohort study on 2,131 implants................................................................................................. 57
S. Fanali, T. Villa, D. Fanali, F. Carinci. Optimization of implant-abutment connection in electro-welded implantology: study and mechanical characterization.......................................................................................................................... 63
F. Carinci, I. Zollino, S. Fanali, A. Motroni, G. Moretti, A. Viscioni, M. Franco and V. Sollazzo. Reconstruction of severely atrophic jaws using homografts: bone density evaluation over time................................................................. 71
A. Graziano, R. D’Aquino, L. Visai, V. Maliardi, L. Benedetti, M.G. Cusella De Angelis, M. Aimetti and F. Carinci. Human card stoma cells after co-culture with human dental pulp cells undergo to osteogenic differentiation through a BMP 2-mediated pathway.......................................................................................................................... 77
U. Baciliero, I. Zollino, S.fanali, A. Busato,V. Vismara, A. Avantaggiato and F. Carinci. Effectiveness of surgical and orthodontic treatment in orthognathic surgery: a retrospective study.......................................................................................................................... 83
A. Graziano, R. D’Aquino, G. Brunelli, S. Fanali and F. Carinci. Sinus lift augmentation using pulp stem cells: A case report and histological evaluation.......................................................................................................................... 89
V. Sollazzo, L. Scapoli, A. Palmieri, S. Fanali, A. Girardi, F. Farinella, F. Pezzetti and F. Carinci. Early effects of pulsed electromagnetic fields on human osteoblasts and mesenchymal stem cells......................................................................................... 95
A. Scarano, B Sinjari, L. Artese, S. Fanali and F. Carinci. Mandible brown tumor caused by primary hyperparathyroidism.......................................................................................................................... 101
M. D’Attilio, D. Rodolfino, C. Chimenti, A. Scarano, F. Festa, S. Fanali and F. Carinci. Posture-stabilometric valuation in Rugby players after mandibular repositioning.......................................................................................................................... 105
M. D’Attilio, D. Rodolfino, B. Sinjari, S. Caputì, R. Gerxhani, A. Scarano, F. Festa, S. Fanali and F. Carinci. Posturostabilometric evaluation of plantar variations in patients with temporomo-dibular dysfunction: A case-control study.......................................................................................................................... 111
A. Scarano, C. Mancino, G. Murmura, S. Frisone, S. Fanali and f. Carinci. Maxillary sinus membrane perforation from nasal suction technique and ultrasonic approach vs. conventional rotative instruments.......................................................................................................................... 117
